

**CAREER OBJECTIVE**

To utilize my programming, logic, problem solving, and creative design skills; my passion for learning, and my appreciation for efficient, and well-formed code and layout; to benefit your company and to create games and/or applications that are useful, intuitive, entertaining, and impressive.

**SKILLS**

Languages		Software		Operating Systems	Other
C/C++/C#	PHP/MySQL	Flash	VS.NET	Windows (3.x/9x/2k/XP)	Excellent Customer Service Skills Tutoring/Leadership Fast Learner
Assembly	HTML/CSS	Blender	Dreamweaver	Windows Vista	
Visual Basic	JavaScript	Photoshop	MS Office	MS-DOS	
Lua	ActionScript	Illustrator	OpenOffice	Various Linux Distro's	
XML/XSLT	Perl	Gimp	Eclipse		

**EDUCATION****Associate of Applied Science in Computer Information Systems**

Parks College, Thornton, CO

2004

- Passed "test out" exams for Keyboarding, College Algebra, Computer Applications [MS Office], Intro to Computer Programming [VB I], Composition II, C++ Programming Language, Computer Industry Research [HTML], Pascal [VB II], and Operating Systems.

**EXPERIENCE****Sr. Web Developer****ServiceLogix**

2009

- Designed and developed web application components and systems.
- Generated dynamic XML documents, through Perl/MySQL/AJAX, and applied XSLT/CSS styling to the content.
- Researched and tested tools/libraries, created documentation, and normalized the code base.
- Responded and took action to change requests and defect tickets.

**Game Programmer****NetDevil**

2006-2007

- Designed and implemented game interfaces, events, and actions, through XML/Lua, and developed code, or translated code from other projects, in C++.
- Network data packet design and implementation for various client/server interactions.
- Benchmark tested and researched tools/libraries, developed external database access tools, and responded daily to bug fixes, change requests, and sprint items.

**Peer Tutor / Test Proctor****DeVry University**

2006-2007

- Tutored students in various subjects, including all Math and Computing courses.
- Proctored placement tests, test outs, and makeup tests.
- Assisted in various administrative tasks as needed.

**Associate Network Administrator****Walsh Environmental**

2004

- Interfaced with employees on a customer service level to provide answers to any computer and network related issues, entering each issue into a help desk ticketing system and resolving each as promptly as possible.
- Performed scheduled maintenance and inventory on all computers and networked equipment, and scheduled and performed thorough maintenance and inventory on all company issued laptop computers on a biweekly basis.

**Network/System Administrator****Parks College**

2004

- Designed and programmed database application in Visual Basic, for quickly and easily identifying professor substitutions and the corresponding contact information in the event of a professor call out.
- Performed daily maintenance on school computers and interfaced with students and professors on a customer service level to provide answers to any computer and network related issues.
- Repaired hardware and software problems with student personal computers, and prepared adequately equipped computers for student use on loan.
